A vitamin-rich, healthy snack

Chewy on the Outside, Moist on the Inside: Partly-dried and Fully-dried Persimmons

Chungdo Wongam is becoming a top-tier food processing and distribution company with a solid vision of the future and the changes it will bring. Its persimmons are seedless and chewy and have no preservatives or artificial colorings. The company is already well-known in Korea for its quality, and is actively looking for ways to bring its products out into the rest of the world.

Product Information

- Major ingredient : Chungdo Bansi(100% domestically-grown)**
 Chungdo Bansi is a variety that represents Korea's astringent persimmons and is called "bansi" for its flat shape. With its soft flesh and high sugar content, it is Korea's only persimmon without seeds, making them easy to eat and process. In a nutshell, it is the most competitive and marketable Korean astringent persimmon.
- Benefits**
 Persimmons are rich in vitamins, amino acids, and other ingredients needed by the body. The vitamin C it contains in incomparably higher amounts than other fruits, is not easily destroyed by heat, water, or air, contrary to the general weaknesses of vitamin C, meaning persimmons bolster the body's immune system, effectively slow down aging, prevent colds, and help one overcome fatigue. Unlike its competitors' partly-dried and fully-dried persimmons, Chungdo Wongam's persimmon products are high in moisture, making them chewy on the outside, soft on the inside and easy to eat as they are seed-free. Their 50% sugar content means they are loved by men and women of all ages. They also retain the healthfulness that nature gave them, without preservatives and food coloring.
- Certificates and awards**
 Good Agricultural Practices(GAP) certification HALAL JAKIM certification
 Protected Geographical Indication(PGI) certification Rural Convergence Industry business certification
 Origin Approved Exporter certification(by item)
 Grand prize at the Contest to Identify Forest Products with Export Potential(Minister of Korea Forest Service)
 Included in Korea's Naver Hall of Honor for direct deliveries from farms
 Excellence award at Chungdo County's persimmon product show
 Commendation for contribution to exports(Gyeongsangbuk-do)

“

Chungdo Wongam Agricultural Corp., Ltd.

specializes in persimmon products, namely, partly-dried and fully-dried permissions of the highest quality. In production, the company uses Chungdo Bansi, or flat persimmons, grown by the company itself in the county of Chungdo-gun in Korea's province of Gyeongsangnam-do. The fresh fruit is placed in advanced refrigeration and dehumidifying driers to minimize nutrient loss for a healthy product that has no preservatives or artificial coloring.

”

Encounter the highest-quality wild-simulated ginseng - a treasure harbored by Mt. Jirisan for a millennia.

Korean Wild Ginseng “Anytime” Liquid Stick & Korean Wild Ginseng “Anytime” Jelly Stick

Hamyang Wild Ginseng Agricultural Corp., Ltd. uses ginseng grown in the clean alpine region of Mt. Jirisan, at an altitude of 500m or higher(average altitude: 800m) in soil facing northeast and rich in germanium. A comparative analysis of the saponin content of wild-simulated ginseng shows that it is 1.7 to 345 times higher(max: 518 times) than cultivated ginseng. Compound-K can also be found in great amounts in wild-simulated ginseng(fights cancer and suppresses metastasis).

Product Information

- **Korean Wild Ginseng “Anytime” Liquid Stick**
 - **Benefits**
Packed in a stick, this is an easy way to take rich wild-simulated ginseng. The undiluted liquid is viscous and has a high solid content.
 - **Main ingredient**
100% domestically-produced, rich undiluted liquid without additives.
 - **How to take**
Squeeze a stick into your mouth once or twice a day. It's most beneficial if you don't swallow it all at once.
 - **Area of production**
Hamyang-gun County, Gyeongsangnam-do Province, ROK
- **Korean Wild Ginseng “Anytime” Jelly Stick**
 - **Benefits**
This jelly stick product can be taken wherever you go. Chill in the refrigerator in summer for a healthy way to alleviate the heat. A high-performance wild-simulated ginseng product that is packed with nutrients, improves immunity, helps overcome fatigue and hangovers, as well as being a great detoxifier.
 - **Main ingredient**
100% domestically-produced, rich undiluted liquid without additives.
 - **How to take**
Squeeze a stick into your mouth once or twice a day. It's most beneficial if you don't swallow it all at once.

“

A treasure cultivated and handed down for 1,000 years in Korea's Jirisan mountain area. Hamyang Wild Ginseng Agricultural Corp., Ltd. is located in Hamyang-gun County, Gyeongsangnam-do Province - a district that has always been blessed with highly-efficacious wild ginseng and mountain herbs, frequented by ginseng diggers and herb gatherers since the olden days. Legend has it that this is one of the places China's Emperor Qin Shi Huang sent his people to find the fabled elixir of life. It is part of the Baekdudaegan Mountain Range that includes Mt. Jirisan, Mt. Deogyusan, and Mt. Baegunsan with its veins of germanium. Wild-simulated ginseng is perfect for these days of health awareness, LOHAS (lifestyle of health and sustainability), and competition as represented by FTAs. An accumulated total of 51 million wild-simulated ginseng roots have been cultivated over 650 ha at some 450 farms from 2003 to the present.
